

# Revolabs Audio Solutions

Hear Every Word!

# Revolabs, Inc.

- Developer and manufacturer of revolutionary wireless audio solutions
- Facilitate natural interaction and wireless mobility in business and professional applications
- Cost effective, flexible and secure solutions that provide superior audio for numerous situations

# Revolabs: Superior Audio

- Revolabs products: superior audio from flexible, secure, and unobtrusive wireless microphones

- Wearable Microphone
  - XLR Adapter for Handheld Microphone
  - Boundary Microphone for Tabletop
- All are interchangeable, secure, wireless, unobtrusive and provide superior audio

# Revolabs: Flexible Solutions

- Max Flex™ technology provides numerous products to be interchangeable and seamless
- Can be tailored for each specific situation
- Can be used for multiple applications

# Applications

- Hearing-impaired solutions
- Medical applications
- Speech recognition
- Distance education
- Podcasting
- Desktop telephone
- Web conferencing and collaboration
- **Audio/Video Conferencing**

*“People who have hearing problems are going to find this device offers new opportunities to overcome their problem. The Revolabs Solo system is compact and easy to use. It worked for me; it will work for others,”*

*-Professor Oliver Oldman*

*Harvard University Professor of Law (emeritus)*

# Audio/Visual Conferencing

- Videoconferencing and teleconferencing are mission critical for Global Fortune 500s
- Strong conferencing capabilities decreases costs and increases overall efficiency
- Conferencing applications need to be:
  - Flexible
  - Easy-to-use
  - Secure
  - Unobtrusive

# Issues With AV Conferencing

- According to a recent survey:

33.9%	Couldn't be heard
29.1%	Couldn't tell who was talking
23.8%	Just poor audio
20.2%	Too much background noise

- Key issues: Tough meeting dynamics, difficult to use, and poor overall audio

# Revolabs Solves These Issues

Couldn't be heard

Couldn't tell who was talking

Just poor audio

Too much background noise

- Each participant has his/her own Solo Microphone that allows him/her to move around the room
- Each microphone uses its own secure channel optimized to the human voice
- Interference free audio using digital spread spectrum
- Wireless placement of the microphone closer to the speaker's mouth and away from noise sources

# Solutions for All Needs

---

- Revolabs has solutions for numerous rooms and applications
  - High-end board rooms
  - Medium-size audio and video rooms
  - Small rooms
  - Flexible rooms and applications
- Rather than re-construct a conference room, Revolabs has a solution to fit each room scenario
- Revolabs allows dynamic deployment of microphone technology to suit changing applications

# High-End Board Room Solutions

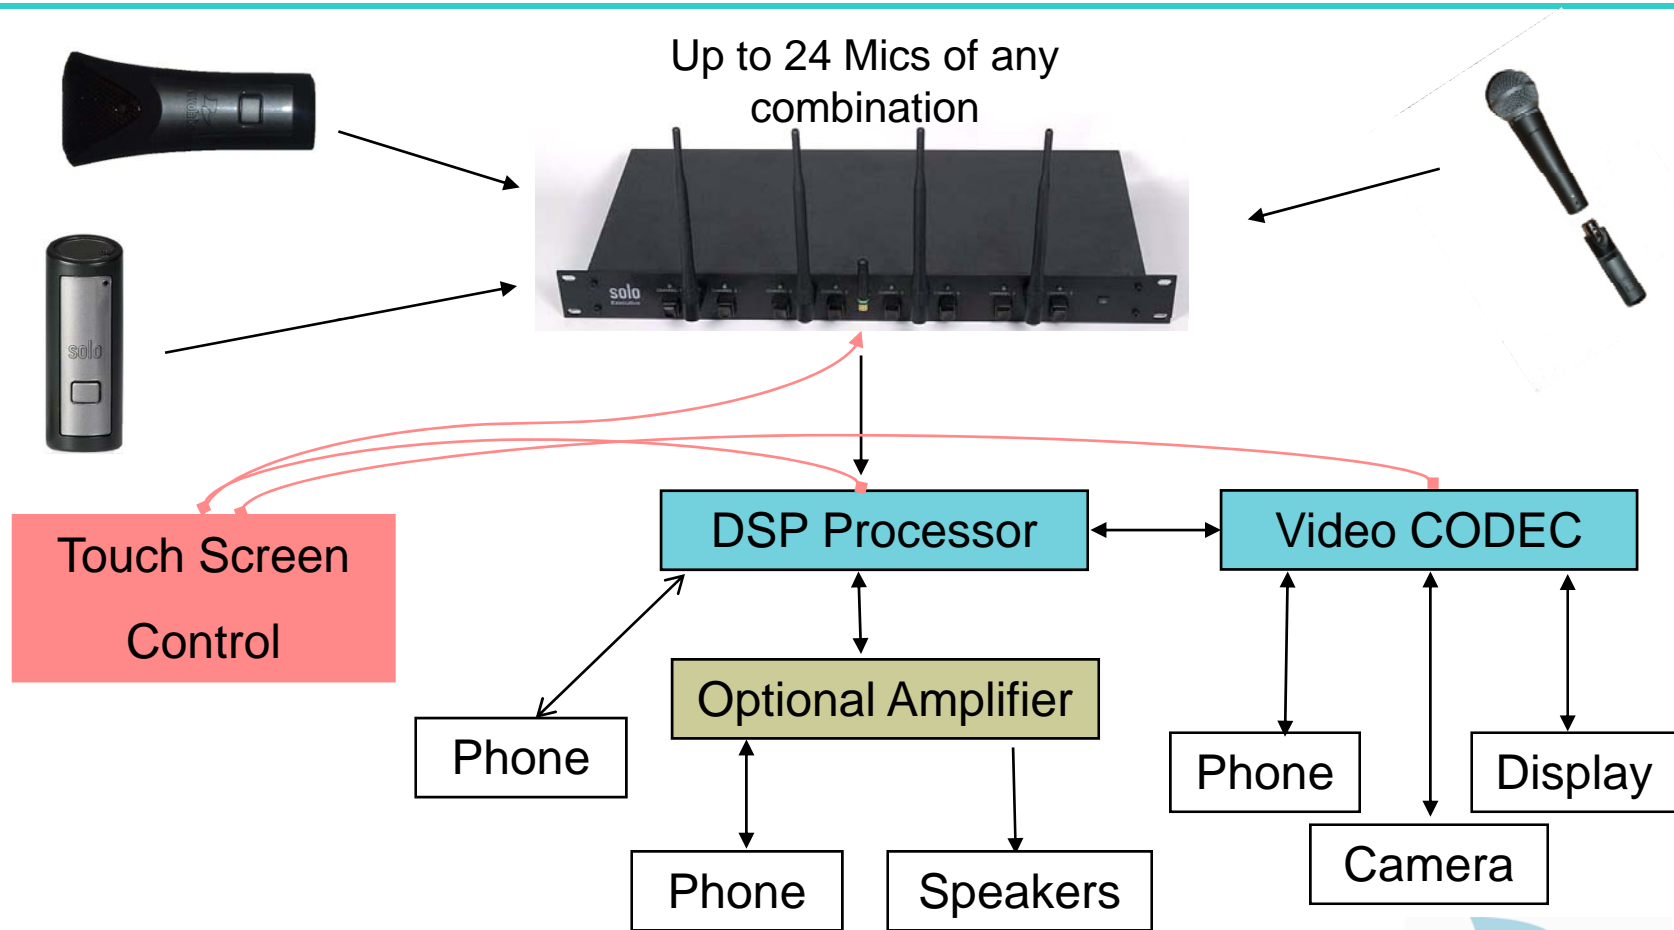

- Revolabs Solo™ Audio Solutions allow users to choose any combination of microphone types:
  - Wearable
  - Uni-directional Boundary Tabletop
  - Omni-directional Boundary Tabletop
  - Handheld XLR Adaptor
- Rechargeable
- Secure
- No wires, therefore no cabling
- Now the conference room can be constructed around exactly what the user wants, not the wires

# Mid-tier Solution (Vortex example)

# Small Rooms

- High quality full duplex audio connects to:
  - Audio and video conferencing system
  - Telephone for VoIP or PSTN voice applications
  - PC (USB port)
- Small form factor
- Rechargeable
- Secure
- No wires

# Entry-level Solution

# Flexible Rooms

- Quickly change the type of microphone without having to purchase a new system
- Rechargeable
- Secure (128 bit encryption)
- Wireless

- Ideal for:
  - Rolling carts
  - Training centers
  - Medical applications
  - Desktop applications
